Hidden functionality

The innovative electric wall-free incliner can be ordered with two motors for an extra charge with **louis** 36130. At first glance, this luxury feature at the touch of a button, which pushes the seat forwards and lowers the backrest, is not visible at all. The function can provide a super relaxing feeling in the zero gravity position. A flexible plug-in headrest is to be ordered for elements with a surcharge function. A contrasting colour thread or the metal leg in various colours elegantly round off the classic cubic sofa.

Incliner for zero gravity position

The 2-motor incliner function is available at an extra charge. This allows you to reach the zero gravity rest position.

Plug-in headrests

Flexible plug-in headrests are ordered in addition for items with motorised adjustment according to the grid width. See ordering information.

Contrasting thread

In some leather and fabric colours this model can be supplied with a contrasting-coloured thread, at no surcharge.

Metal colours for legs

Some legs can be ordered in high-gloss chrome-, silver, bronze- or black-coloured. Please indicate.

Metal colours for push-button switches

The push-button switches are available in silver or black powder-coated. Please specify colour.

ORDER INFORMATION

Ordering the functions:

Incliner twin motor = **RFS2**

The seat slides forwards upwards, the back tilts and a footrest folds out. This creates a resting position in which the feet and legs are higher than the heart. This can improve blood flow to the head and relieve pressure on the heart.

The functions can be ordered for the individual seats. A flexible plug-in headrest must be ordered when ordering the RFS1/RFS2 incliner functions. This also applies to the one arm chaises. This can be inserted into the backrest body.

Accessories USB-C connection:

With the USB-C connection, any end product can be used in accordance with the current USB-C standard. To ensure perfect functionality, we advise you to only use the original charging cable from the respective manufacturer. It is only possible in conjunction with

www.schillig.com

the motorised functions. The output power is 5V/2.1 A. It is sufficient to charge all standard end devices, including tablet PCs. It is integrated into the function push-buttons on the furniture and is available in various metal colours. Please specify.

Back sides of sofas:

All pieces are genuinely upholstered at the back.

Connecting sides:

For a surcharge, the connecting sides can be supplied in the original cover instead of stretch fabric.

Seam appearance:

Decorative, felled or double seams may appear different in fabric and leather versions. For manufacturing reasons, seams may be left out of the fabric version or replaced with simple seams.

Contrasting thread:

This model is available in leather and some fabric colours with contrasting colour thread at no extra charge. You will find the specified colours in our fabric/leather trolley. Please state the no., otherwise tone-in-tone will be delivered.

Thread design:

The model is generally manufactured with a pearl yarn thread in leather as well as in the fabrics S37, V52 and V85 and also in connection with contrasting thread requests. This is a stronger, beautifully twisted thread.

All of the dimensions given are approximate dimensions in cm in width/depth/height/seat height. We reserve the right to make changes.

Note on seat height:

The final seat height on this model is only reached over time by sitting in, due to the

upholstery construction.

Seat depth: approx. **57 cm**

Seat depth with function: approx. **108 cm**

Seat height with function: approx. **70 cm**

Armpart width: approx. **14 cm**

Armpart height: approx. **61 cm**

Recommended wall distance: approx. **25 cm**

Overall height incl. plug-in headrest: ca. **112 cm**

Overall depth with function: approx. **157 cm**

Particularly casual upholstery:

The upholstery of the model is particularly casually processed to create a certain visual appearance, which is characterised by a super soft surface. Covers may already show a pronounced wave pattern on delivery, which is intentional in terms of design and construction and can become even more pronounced during use. This is not a quality defect, but a model-related characteristic.

Digital fabric/leather and colour samples:

The visual appearance of the covers and colour samples may vary, samples in accordance - colour and structure deviations possible.

Note on the upholstery structure:

For this model, inlets with chamber cushions have been used in the seat and back cushions. This can lead to the marking of individual chambers and is a typical feature of the product.

Technical change regarding the plug-in head restraints:

From order date 1st November 2024, the plug-in head restraints will no longer be supplied with a metal bracket in glossy chrome but in black powder-coated.

metal leg **diff. metal col.**

F C3

Metal colours:

Some of the metal legs are available in different metal colours. Please indicate the colour when ordering.

Powder-coated:

The colours M21 silver, M56 bronze and M99 black are powder-coated.

Leg and floor protection:

Slim furniture legs with a small gliding surface

exert increased pressure on the floor. For sensitive floors, we recommend fitting glides/ an underlay to protect against scratches and pressure marks.

Metal colours for push-button switches:

The push-button switches are available in various metal colours, in silver (T00) or black (T77). These colours are powder-coated. Please specify the desired colour when ordering.
