Flexible headrest

Every chaise is equipped with a flexible headrest with notch function in standard.

Different look

The frame base of the chaise ist wider if the motorised adjustment is chosen than with the manually function. See order information.

Various frames

Rocking frame (B1), cantilever (B2), metal runner (B3) and elliptical metal runner (B4); partly available in different colours.

Flexible chaise

Leg section and back can be adjusted by ratchet function, steplessly by double motor or by double motor with battery at an extra charge.

Plug-in armparts

The plug-in armparts can be attached to the right and left of the chaise as required. They can be swivelled for easier access.

ORDER INFORMATION

Load-bearing capacity:

This chaise is **not** for using from more than one person. A maximum load-bearing capacity up to 120 kg is guaranteed.

Adjustment by motor with battery pack:

Please pay attention that with using the adjustment by double motor with battery pack the battery has to be charged completely every 4-6 weeks.

Seam appearance:

Decorative, felled or double seams may appear different in fabric and leather versions. For manufacturing reasons, seams may be left out of the fabric version or replaced with simple seams.

All of the dimensions given are approxima-

te dimensions in cm in width/depth/height/ seat height. We reserve the right to make changes. These are maximum dimensions of the minimum footprint. Differences are possible due to the cushion pad attached with a zip.

Achtung! Aufgrund ihrer warentypischen Waffeloptik ist diese Liege beim Einsitzen im mittleren Bereich etwas breiter. Daraus könnten Abweichungen in der Breite resultieren, welche keinen Reklamationsgrund darstellen.

Contrasting thread:

This model is available in leather and some fabric colours with contrasting colour thread at no extra charge. You will find the specified colours

in our fabric/leather trolley. Please state the no., otherwise tone-in-tone will be delivered.

Plug-in armparts:

The plug-in armpart SDR can be plugged into the chaise as turnable armrest front-standing right. The plug-in armpart SDL can be plugged in front-standing left.

Please note:

If the rocking frame B1 is ordered, the functions F2, F3 and F3+ cannot be ordered additionally for technical reasons.

When ordering the chaise with manual function or completely without function, the frame is narrow with semicircular profile. When ordering the functions double motor or double motor with battery pack, the frame is wide for techni-

cal reasons (installation counter for the motor).

Especially casual upholstery:

The upholstery is especially casually processed to create a certain appearance with a super soft surface. The covers may already show a pronounced wavy appearance on delivery, which is intentional due to the design and construction and may become even more pronounced with use. This is not a quality defect, but a model-related characteristic.

Information on the upholstery structure:

Chamber cushions filled with a high-quality mix of polyester fibres and foam rods have been used in the seat and back. This can lead to depression of the individual chambers, which is a typical product characteristic.

Inclination of the chaise:

The inclination differs between motorised and manual versions. Only manually can the chaise assume the heart balance position. Blood circulation, intervertebral discs and spine can thus be relieved.

Note on seat height:

The final seat height on this model is only reached over time by sitting in, due to the upholstery construction.

Digital fabric/leather and colour samples:

The visual appearance of the covers and colour samples may vary, samples in accordance - colour and structure deviations possible.
