### Flexible headrest

Every chaise is equipped with a flexible headrest with notch function in standard.

### Flexible chaise

Leg section and back can be adjusted by ratchet function, steplessly by double motor or by double motor with battery at an extra charge.

### Contrast thread

This model is available in leather and some fabric colours with contrasting colour thread on request at no extra charge.

### Various frames

Rocking frame (B1), cantilever (B2), metal runner (B3) and elliptical metal runner (B4); partly available in different colours.

## ORDER INFORMATION

### Load-bearing capacity:

This chaise is **not** for using from more than one person. A maximum load-bearing capacity up to 120 kg is guaranteed.

### Adjustment by motor with battery pack:

Please pay attention that with using the adjustment by double motor with battery pack the battery has to be charged completely every 4-6 weeks.

### Seam appearance:

Decorative, felled or double seams may appear different in fabric and leather versions. For manufacturing reasons, seams may be left out

of the fabric version or replaced with simple seams.

**All of the dimensions given are approximate dimensions in cm in width/depth/height/seat height. We reserve the right to make changes. The dimensions are given in maximum to show your needed space for the furniture.**

### Contrasting thread:

This model is available in leather and some fabric colours with contrasting colour thread at no extra charge. You will find the specified colours in our fabric/leather trolley. Please state the

no., otherwise tone-in-tone will be delivered.

### Please note:

**If the rocking frame B1 is ordered, the functions F2, F3 and F3+ cannot be ordered additionally for technical reasons.**

When ordering the chaise with manual function or completely without function, the frame is narrow with semicircular profile. When ordering the functions double motor or double motor with battery pack, the frame is wide for technical reasons (installation counter for the motor).

### Crease formation:

Fabric and leather stretch during use, „creases“

may form in the cover. This has no influence on use, function and service life and does not constitute a material defect.

### Information on the upholstery structure:

Chamber cushions filled with a high-quality mix of polyester fibres and foam rods have been used in the seat and back. This can lead to depression of the individual chambers, which is a typical product characteristic.

### Inclination of the chaise:

The inclination differs between motorised and manual versions. Only manually can the chaise

assume the heart balance position. Blood circulation, intervertebral discs and spine can thus be relieved.

### Note on seat height:

The final seat height on this model is only reached over time by sitting in, due to the upholstery construction.

### Digital fabric/leather and colour samples:

The visual appearance of the covers and colour samples may vary, samples in accordance - colour and structure deviations possible.
