

# *fabric* Longlife

## Fabric R66

**These materials are elegant chenille flat woven fabrics.**

Product width: approx. 140 cm

Abrasion cycles: as per RAL 430/4 for working on upholstered furniture

Composition: NS: 85% polyester, 15% nylon  
GS: 100% polyester

Scrub resistance: ★★★

Rub fastness (colour wear): ★★

Light fastness: ★★

Pilling behaviour: ★★★

Right reserved to make structural and colour changes!

**Care and cleaning:** with commercially available products

### Characteristics typical of the product:

- Every flat woven fabric will become roughened during use.
- Nap changes (seat shine/shiny areas) are unavoidable with all chenille fabric.
- The chenille effect will become somewhat flatter over time.
- When in use patina and shiny patches must be expected.
- The weave produces light and dark variations/incidence of light or raster variants.
- Pilling is unavoidable and can be caused by the adherence of clothing and other textile fibres.
- This textile is layered with a stain protection.
- **Water should be dabbed off as water stains can remain easily visible.**

**Caution:** Discolouration caused by textiles are excluded from every manufacturer warranty.

This is not a fault in the material, but a defect in the clothing material. The complaint should be addressed to the clothing store where the article was purchased. The „polluter pays“ is the principle that applies here.

★★★ very good, ★★ good
