COLLECTION 2023

Carry Life lightly
and enjoy it deeply
is, after all, the Sum of all Wisdom.

— Wilhelm von Humboldt —

W.SCHILLIG
OUTDOOR

www.schillig-outdoor.com

For decades, W.SCHILLIG has stood for first-class seating furniture with the best seating comfort. With our exceptionally high level of development expertise in the areas of seating comfort and the processing of high-quality materials - in conjunction with our international production locations - we are unique in Europe as an owner-managed company of this kind. This uniqueness is also reflected in our products!

Discover the special outdoor living feeling with our collection from W.SCHILLIG! This includes practical products in the usual exceptional W.SCHILLIG quality, with appealing design, adapted to the challenges and demands of your special future location.

Robust and weather-resistant frames form the solid foundation of W.SCHILLIG outdoor. In combination with hand-picked cover materials from renowned manufacturers in this segment as well as useful features such as storage options and weather protection covers, we offer a whole new variety from which the customer can create his own individual piece of furniture.

On the following pages, we present the furniture and cover collection in detail in terms of its technical and functional product features and show many installation examples to support your personal selection.

Terrace *Stories*
by

W
W.SCHILLIG
OUTDOOR

Ideas seem to come from everywhere —
my life, everything I see, hear and read,
and most of all, from my imagination.
I have a lot of imagination.

— Judy Blume —

LET THE SUN SHINE!

Juicy Mandarin

Lively orange ensures a good mood, pure joie de vivre and summer feeling!

Let yourself be tickled by the sun on this corner combination that invites you to sit in a small circle!

Let yourself also be inspired by our look in the unconventionally imperfect boho style. Hippie chic is the popular and cutting-edge home trend that is currently experiencing a rapid upswing.

Sunny side up!

www.schillig-outdoor.com

Base plateaus:

Q80TK - Q80TK (1x VE)

Seat elements:

M80L - M80K - M80R - G80

BEACH-FEELING

Caribic Mint

Fresh mint provides visual cooling and reminds us of summer, sun, sunshine and beaches with turquoise blue water.

Enjoy that paradise feeling at home with this generous combination that can become a shady oasis of calm!

Breathe fresh air!

Base plateaus:

Q80TK - Y16KK - Q80TK
(2x VE)

Seat elements:

M80K - E - M80K - M80K
- M80K - G80

www.schillig-outdoor.com

www.schillig-outdoor.com

FIRST

Romance

Delicate and light-hearted like the petals of a daisy, this picture story comes across.

If you prefer a clean, fresh look, this is exactly what you need! Experience lightheartedness with this small but fine combination and let yourself be inspired by our modern-romantic look.

**How do daisies actually know
who loves whom?**

Base plateaus:
Q80TK - Q80TK; T80.K
(1x VE)

Seat elements:
E - M80K - M80K - G80

TO BE OR NOT TO BE

Cool Grey

www.schillig-outdoor.com

Chic grey is the colour mood for all those who like it discreet, cool and neutral.

Concentration on the essentials is very important here: Rest and just breathe. Pure relaxation.

Let yourself be inspired by our look in elegant and meditative style for the Zen oasis at home.

Breathe in. Breathe out.

Base plateaus:
Q80TK - Q80TK; T110K
(1x VE)

Seat elements:
M80L - E - M80K - M80K

CHILL OUT YOUR LIFE.

Easy going

The black and white colour concept provides structure. Playing cleverly with the contrasts, the spacious lounge combination shown here looks very interesting and extremely comfortable.

As structured as the colour harmony is, the outdoor furniture can be easily rearranged – easy going. So that you can simply take a more „chilled“ approach to life.

Bold eye-catchers in sunny colours inspire this look to youthful playfulness. Do you realise how versatile the combination of grey and white is?

The disadvantage of doing nothing is that you never know when you're done.

www.schillig-outdoor.com

Base plateaus:

Y80TK - Y16KK - Y16KK - Q80TK -
Q80TK; T110K
(4x VE)

Seat elements:

M80K - M80K - G80 - E - M80K -

Base plateaus:
Y16KK - Y16KK - Q80TK - Q80TK
- Y80TK; T110K

Seat elements:
E - M80K - M80K - G80 - E - M80K
- G80 - M80K - M80R

Here, the kids can show you how it's done very easily:

Simply replace and rotate a plateau and exchange the seat and corner element – in no time at all, the result is a completely different seating landscape. There are no limits to the imagination.

The elements are really almost as light as a feather and very easy to put on.

Easy to change.

MARITIME BLUE

Sail away

Counteract wanderlust and bring the sea into your home. With this maritime colour theme, you will fill your terrace with fresh energy.

Experience inner peace and transcendence: If you listen carefully — maybe you can hear the ocean gently rushing?

**Life is too short for “someday”.
— Welcome aboard!**

Base plateaus:
Q80TK - T80.K - Q80TK

Seat elements:
M80L - E - M80K - M80K

www.schillig-outdoor.com

OCEAN &

Seagrass

Be brave for once and simply combine the colours green and blue. Together, they create naturalness and freshness.

This look reminds us of the vast ocean, interspersed with fields of delicate seaweed.

Calming and inspiring, isn't it?

The little lagoon for the small terrace or the balcony in the flat.

“There is nothing more beautiful than the way the ocean refuses to stop kissing the shore, no matter how many times it has been sent away.”

– Sarah Kay –

Base plateaus:

Y16KK - Y80TK
(1x VE)

Seat elements:

M80L - E - M80K

FINALLY CLOSING TIME!

Sunkissed

This dream lounge offers enough space for a nice get-together among friends for a cosy after-work drink in a relaxed atmosphere.

This arrangement is extremely generous and can accommodate at least 8 people. Enjoy your well-deserved evening and see what develops from such a balmy summer night.

You have to combine the two and let them alternate with each other, solitude and conviviality.

One awakens in us the longing for people, the other the longing for ourselves.

— Seneca —

CUDDLE FACTOR

Hot like Fire

Lagoon and campfire romance also go wonderfully together. Plenty of space and room to warm up together by the fire and relive old stories, or to snuggle up under the stars.

Let your dreams come true.

If we all spent more time singing under the stars around the campfire, the world would be a whole lot more in order.

– Gesa Neitzel in Breakfast with Elephants –

ORDER INFORMATION

All of the dimensions given are approximate dimensions in cm. We reserve the right to make changes. Dimensions are given as follows: width/depth/height/seat height.

Please note that there is a gap of approx. 1 cm between the plinths when connecting them. This allowance must be taken into account when calculating the assembly. The backs protrude approx. 10 cm beyond the edge of the plateau. Side sections protrude approx. 2 cm. The total height/seat height cannot simply be added up because the plastic glide on the seat element sinks approx. 2 cm into the recess on

the base plateau when it is pushed on.

Seat depth: approx. **63 cm**

Seat depth corner element: approx. **61 cm**

Total height of base plateau including seating elements: approx. **85 cm**

Seat height base plateau including seat element: approx. **46 cm**

Armpart with without plateau: approx. **14 cm**

Armpart height without plateau: approx. **40 cm**

Armpart height with plateau: approx. **63 cm**

Panel thickness: approx. **19 mm**

Connecting pieces:

The plateaus can be connected to each other

with the connecting piece VE, which is placed between the plateaus under the plastic glides. Please order the connecting piece separately, see price list. Table platforms and overhangs cannot be joined together.

Anti-tilt device:

For free-standing elements that do not stand in front of a wall or similar, we recommend fitting the elements with the anti-tilt device. We supply two anti-tilt devices per element, one per ottoman. More can be ordered if required, see price list. Due to the risk of falling, we strongly recommend fitting the anti-tippers when the

parts are not against a wall.

Positioning diagram:

Please send us a positioning diagram, depending on the many different variations available.

Crease formation:

Fabric and leather stretch to a lesser or larger extent under the influence of body weight, which can lead to the formation of creases in the cover. This visual change does not affect use, function and life span and it is not a defect.

Weather protection covers:

High-quality weather protection covers in different sizes according to the ordered items

can effectively protect your outdoor furniture from the weather. They are made of a water-permeable, breathable membrane (V99/21, Sunbrella Surlast) that is washable, UV-stable, lightweight and foldable. An additional rubber loop safety device on the underside provides further protection from the wind.

Covers in model images/digital fabric and colour samples:

The visual appearance of the covers and colour samples may vary, samples in accordance - colour and structure deviations are possible.

Seating element inserted into plinth plateau.
To be seen here:
the black plastic glides.
They are also available in grey – see image.

Anti-tilt device (screwed with grub screws in holes).

The connecting part is placed precisely on the plateau recesses. The connection of the plateaus is made by pushing on the seats.

How it works:

The various seating elements can be individually plugged onto the base plateaus. This allows many different lounge combinations in no time at all.

All seat elements are equipped with light grey or black plastic glides. The desired colour must be specified when ordering. The plastic glides also serve as legs if the elements are placed directly on the floor – without a plateau.

The plateaus can be connected to each other with the connecting piece VE, which is placed between the plateaus under the plastic glides. Please order the connecting piece separately, see price list. Table platforms and overhangs cannot be joined together.

For free-standing elements that do not stand in front of a wall or similar, we recommend fitting the elements with the anti-tilt device. We supply two anti-tilt devices per element, one per ottoman. More can be ordered if required, see price list. Due to the risk of falling, we strongly recommend fitting the anti-tippers when the parts are not against a wall.

39500 SPECIAL FEATURES, MATERIALS & PROCESSING

- 1 Open-pored **ergoPUR upholstery foam** (density 35/46) according to DGM guidelines with high comfort in seat and back.
- 2 Base frame made of **aluminium** tube (rectangular profile).
- 3 Breathable **3-layer laminate**. Waterproof, and cuddly.
- 4 **Stainless steel** screws connect plateau, plinth frame/legs and aluminium frame.
- 5 **Aluminium** tube frame at base, **powder-coated**, rectangular.
- 6 Plastic leg
- 7 Fully synthetic, perforated and anti-slip mesh.
- 8 **Diolen wadding** 180 g/m²
- 9 Base plateau made of high-quality **polystone** in white.
- 10 Metal legs or runners made of cast **aluminium**, **powder-coated**.
- 11 Pull-in seams between seat and back, or side section with additionally **glued** closing seam.
- 12 High-quality cover material of weather-resistant outdoor fabrics.

Properties of the materials/processes used:

Aluminium

Extremely light, weather-resistant and highly stable metal, impact-resistant, UV-resistant, forms a corrosion-resistant oxide layer on contact with air. Harmless to health, recyclable and easy to clean. Does not rust. Particularly light.

ant to chemicals and abrasion. Easy to clean. Fulfills high visual demands.

Bonding

Weatherproof special adhesive for outdoor use – UV light resistant, waterproof and resilient.

Diolen wadding

Also called polyester fleece, quilting fleece, upholstery fleece; is durable, dimensionally stable and hard-wearing. Diolene wadding is applied between the upholstery fabric and the foam to prevent chafing of the upholstery fabric and to give the upholstery a plump appearance.

ergoPUR upholstery foam

(density 35/46)

Advantage over outdoor foam: better dimensional stability and higher density for low wear of the foam. Good air permeability.

Polystone

High-quality material, precisely processed under high quality standards. Extremely resilient, weather-resistant and frost-proof. Solid, with a natural and noble look. Very light. Specially developed for outdoor use. Without coated edges, as both material and surface are consistent.

Stainless steel

High resistance to corrosion, acids and temperatures. Easy to clean, durable, meets high hygienic requirements.

3-layer laminate

Breathable, cuddly, wind- and waterproof and at the same time water vapour permeable high-tech product as an additional layer.

Powder coating

Impact-resistant, durable, mechanically resilient, weather-resistant and environmentally friendly due to solvent-free processing. Highly resist-

"If lust for life and joie de vivre
are under one blanket,
the grey everyday life
has to give way."

— Ernst Ferstl —

PLAYING

funny Games

The table used here is a table plateau from **Lagoona dark** 39510.

This large lounge combination has room for the whole family. Nothing stands in the way of fun playtime on the sun terrace.

Get going and feel good!

„Because, to put it bluntly, man only plays where he is in the full sense of the word human being, and he is only fully human where he plays.“

— Friedrich Schiller —

ENJOY THE

Sunset

This lovely olive green makes **Lagoona light** 39502 shine wonderfully and yet has a calming and liberating effect. Perfect for the small, green oasis at home.

This cosy combination is space-saving for the small balcony or the mini terrace island.

„Sunset is still
my favourite colour
and rainbow is a close second.“

— Mattie Stepanek —

ORDER INFORMATION

All of the dimensions given are approximate dimensions in cm. We reserve the right to make changes. Dimensions are given as follows: width/depth/height/seat height.

Notes on the dimensions:

The dimensions of the elements and ottomans refer to the respective item including the matching round tube frame. The gap between all seat elements is always approx. 1 cm.

Seat depth: approx. **62 cm**

Seat depth corner element: approx. **61 cm**

Armrest width: approx. **14 cm**

Armrest height: approx. **61 cm**

Crease formation:

Fabric and leather stretch to a lesser or larger extent under the influence of body weight, which can lead to the formation of creases in the cover. This visual change does not affect use, function and life span and it is not a defect.

Covers in model images/digital fabric and colour samples:

The visual appearance of the covers and colour samples may vary, samples in accordance - colour and structure deviations are possible.

Lagoon light

39502 SPECIAL FEATURES

Lagoon light 39502 can be ordered in a combination of different cover qualities and colours. This means that within the sofa elements, the seats can be covered differently.

Indication cover 1 = seat element protruding left

Specification cover 2 = seat element protruding right

See illustration below.

www.schillig-outdoor.com

Round tube frame in white powder-coated (WE).

Round tube frame powder-coated in basalt grey (AN).

Child's play to hook in the connecting plastic rails to securely connect the individual elements.

Flexible plastic glides on white round tube frame.

Flexible plastic glides on basalt grey base.

The various seating elements are firmly screwed to the corresponding base frame.

The round tube frames have a diameter of approx. 20 mm and are made of firmly welded tubular steel, which has been powder-coated in white or basalt grey outdoor-resistant. The desired colour must be specified when ordering:

Art. no. Frame version white = WE

Art. no. Frame version basalt grey = AN

The integrated plastic glides are flexible and therefore compensate for any unevenness of the floor.

The round tube frames can be securely connected with the aid of the connection set, consisting of two plastic rails which are clipped into the round tube frame. Please order the connection set separately, see price list.

High-quality weather protection covers in different sizes according to the ordered items can effectively protect your outdoor furniture from the weather. They are made of a breathable membrane (Sunbrella® Surlast) that is washable, UV-stable, lightweight and foldable. An additional rubber loop protection on the underside provides further protection from the wind.

Lagoona light

39502 SPECIAL FEATURES, MATERIALS & PROCESSING

- 1 Open-pored **ergoPUR upholstery foam** (density 35/46) according to DGM guidelines with high comfort in seat and back.
- 2 Base frame made of **aluminium** tube (rectangular profile).
- 3 Breathable **3-layer laminate**. Waterproof, breathable and cuddly.
- 4 **Stainless steel** screws connect round tube frame and aluminium frame.
- 5 Round steel tube frame, **TIG welded**, powder-coated in white or basalt grey.
- 6 Fully synthetic, perforated and anti-slip mesh.
- 7 **Diolen wadding** 180 g/m²
- 8 Movable glides adapt to the surface.
- 9 Pull-in seams between seat and back, or side section with additionally **glued** closing seam.
- 10 High-quality cover material of weather-resistant outdoor fabrics.

Properties of the materials/processes used:

Aluminium

Extremely light, weather-resistant and highly stable metal, impact-resistant, UV-resistant, forms a corrosion-resistant oxide layer on contact with air. Harmless to health, recyclable and easy to clean. Does not rust. Particularly light.

Stainless steel

High resistance to corrosion, acids and temperatures. Easy to clean, durable, meets high hygienic requirements.

3-layer laminate

Breathable, cuddly, wind- and waterproof and at the same time water vapour permeable high-tech product as an additional layer.

Powder coating

Impact-resistant, durable, mechanically resilient, weather-resistant and environmentally friendly due to solvent-free processing. Highly resistant to chemicals and abrasion. Easy to clean. Fulfills high visual demands.

Bonding

Weatherproof special adhesive for outdoor use – UV light resistant, waterproof and resilient.

Diolen wadding

Also called polyester fleece, quilting fleece, upholstery fleece; is durable, dimensionally stable and hard-wearing. Diolene wadding is applied between the upholstery fabric and the foam to prevent chafing of the upholstery fabric and to give the upholstery a plump appearance.

ergoPUR upholstery foam

(density 35/46)
Advantage over outdoor foam: better dimensional stability and higher density for low wear of the foam. Good air permeability.

TIG welded seams

TIG welded seams are of high quality and clean, the joints are stable. Weld spatter does not form.

Elegant round steel tube frame

The round tube frame is powder-coated white or basalt grey and outdoor-resistant. The integrated plastic glides are flexible and therefore compensate for any unevenness of the surface.

MEETS

Mint Blush

Professional success and the ability to achieve top performance are based on a fulfilled private life. This is the quintessence of the term „work-life balance“.

For example, bring a little more balance into your work life and that of those around you by simply making the next team meeting more unconventional. Shifting the location, creating visual stimuli and a beautiful atmosphere inspire new ideas!

The wow effect in the colour play, which was created here by combining fresh mint with warm blush, is extravagant and yet looks calm and natural.

Realise yourself!

CELEBRATE SUCCESS!

Classic Accents

www.schillig-outdoor.com

Pillows: www.rohleder.com

When the goals have been achieved after the work is done and the stress is relieved, a success can also be celebrated among colleagues. Rejoice together over positive conclusions and formulate thoughts and visions for the next goals.

We support non-territorial office concepts, creativity and good ideas with our modern seating solutions. Because conventional offices with fixed desks are simply no longer in keeping with the times.

Classic grey has been spiced up here relatively simply with a few splashes of colour in the colourful patterned pillow.

Here's to the next goals!

Purple Rain

Violet stands out and sets original accents. Here, earthly red and heavenly blue unite and become the epitome of the mystically mysterious.

As you can see here, a bold colour choice for the covers can have a very appealing effect. Mixed with opulent purple, visual attention is easily achieved.

Be brave for once.

RELAXING GREEN

Namasté

www.schillig-outdoor.com

„Work-life balance“ is based on a fulfilled private life. Take time for yourself, to relax and for your soul. In this way, the whole inner attitude can become more peaceful and balanced – as in the „inside“ so in the „outside“. When we meet a person with „Namasté“, we also acknowledge the individual soul and the divine spark in the heart of the other person. A very special appreciation, then.

Here, the green colour effect is relaxing and restorative for the whole body. Green also has a calming effect on the nervous system. For this **Bailandoo** 39530 group, we have combined very harmonious colours from our Potpourri.

For more mindfulness.

ORDER INFORMATION

All of the dimensions given are approximate dimensions in cm. We reserve the right to make changes. Dimensions are given as follows: width/depth/height/seat height.

Total height of base frame including seat cushion S96/S64/S32:

approx. **44 cm**

Total height base frame including shelf LT32:

approx. **27 cm**

Total height base frame incl. armrest high SA 32: approx. **59 cm**

Total height base frame incl. seat elements S96/S64/S32 plus back element with cushion UK:

approx. **86 cm**

Total height base frame incl. seat element S96/S64/S32 plus backrest attachment cubic PK:

approx. **73 cm**

Total height base frame incl. seat element S96/S64/S32 plus back attachment round PS:

approx. **79 cm**

Notes on the dimensions:

The total height/seat height cannot simply be added up, as the seat cushions sink approx. 2 cm into the aluminium base frame when placed on top.

Crease formation:

Cover material stretches to a lesser or larger extent under the influence of body weight, which can lead to the formation of creases in the cover. This visual change does not affect use, function and life span and it is not a defect.

Covers in model images/digital fabric and colour samples:

The visual appearance of the covers and colour samples may vary, samples in accordance - colour and structure deviations are possible.

www.schillig-outdoor.com

W.SCHILLIG
OUTDOOR

How it works:

The various, loose seat cushions and the storage plate can be individually inserted into the aluminium base frames. The base frames can be securely connected with the aid of the connection set, consisting of two polyamide 12 clamps which are clipped into the frames at any point. Two clamps are always required for each side of the frame. Polyamide 12 is a very robust thermoplastic with high chemical resistance, light and weather resistant. Please order the connection set separately, see price list. This allows for many different lounge combinations in no time at all.

The aluminium plinth frames can be ordered powder-coated in white or basalt grey. The desired colour must be specified when ordering:

Art. no. Frame version white = KWE

Art. no. Frame version basalt grey = KAN

The colour of the shelf depends on the ordered colour of the aluminium plinth frame.

The back elements, arm section cushions and the cushion allow further design freedom. New combinations are possible again and again.

High-quality weather protection covers in different sizes according to the ordered items can effectively protect your outdoor furniture from the weather. They are made of a water-permeable, breathable membrane (Sunbrella® Surlast) that is washable, UV-stable, lightweight and foldable. An additional rubber loop safety device on the underside provides further protection from the wind.

- 1 Open-pored **ergoPUR upholstery foam** (density 35/46) according to DGM guidelines with high comfort in seat cushions, back- and armrest attachments.
- 2 **Aluminium** base frame, **powder-coated** white or basalt grey.
- 3 **3-layer laminate**. Waterproof, breathable and cuddly.
- 4 **Diolen wadding** 180 g/m²
- 5 Integrated weights weigh down the back and armrest attachments for secure support.
- 6 Metal legs or skids made of cast **aluminium, powder-coated** in white or basalt grey.
- 7 Anti-slip mat on the underside of the back and arm section attachments.
- 8 Stainless steel screws connect the metal parts.
- 9 Female slats with **glass-fibre** reinforced plastic core.
- 10 High-quality cover material of weather-resistant outdoor fabrics.

Base frame in white (art. no. KWE) or basalt grey (art. no. KAN).

Piping on the outer edges of the seat cushion

Leg versions available to order:
Metal base FY1 or metal runner F 15 (at an extra charge), in different metal colours each.
Please specify when ordering.

ORDER INFORMATION

Filling:

Cover material made of water-repellent spunbond (40 g/m², PP 40). Filling made of a mixture of 20% siliconised hollow fibre and 80% foam rods RG 25/15 quick-drying, weather-resistant and durable. Additional cover with breathable 3-layer laminate. This membrane is located between the cover and the filling cushion.

All of the dimensions given are approximate dimensions in cm. We reserve the right to make changes. Dimensions are given as follows: width/depth.

Zips:

The pillow covers have visually unobtrusive zips in the outer seam area. This allows you to conveniently separate the

cover from the filling if you wish.

Crease formation:

Cover material stretches to a lesser or larger extent under the influence of body weight, which can lead to the formation of creases in the cover. This visual change does not affect use, function and life span and it is not a defect.

Plaids:

The plaids are made of spun-dyed acrylic.

Covers in model images/digital fabric and colour samples:

The visual appearance of the covers and colour samples may vary, samples in accordance - colour and structure deviations are possible.

FEEL GOOD AND *decorate*

Pillows and plaids loosen up, set eye-catching points and support when sitting or lounging.

We also like to use the pillows from the Rohleder Home Collection to decorate our outdoor furniture arrangements, as these have weather-resistant properties and are always a great eye-catcher.

HOME COLLECTION

www.rohleder-home-collection.com

"When you are attentive to everything,
you become sensitive,
and being sensitive has
an inner perception of beauty,
it has a sense of beauty."

—Jiddu Krishnamurti—

We have specifically selected the covers for our outdoor collection under very specific aspects so that they meet the special requirements. We have consciously decided to offer different cover materials. These differ not only in design and colour, but also in their material composition, values, usage properties and, of course, price. In this way, you can put together your own individual outdoor furniture from a wide range of outdoor-suitable fabrics.

Outdoor covers have to withstand sun, rain, wind and weather. We have also attached importance to breathability, the best care properties and a pleasant feel and look. We have summarised everything you need to know on the following pages.

Cover Materials

Overview

OF COVER MATERIAL

Fabric Covers	Material Class	Reference Type	Martindale abrasion resistance	Composition	Light fastness (DIN ISO EN 105-B02)	Pilling	Flammability	Other
O80	SK 70	Jacquard flat weave	30.000	100% spinneret-dyed acrylic, Tempotest fibre	7 – 8 at 1 – 8 (DIN ISO EN 105-B04)	4 – 5 at 1 – 5		weatherproof, according to the manufacturer suitable for almost all weather conditions and temperatures, OEKO-TEX® Standard 100, 6-year manufacturer's guarantee onto the cover fabric – see details on following pages, PURATEX®-cleaning set for outdoor cover materials
J81	SK 100	Jacquard/Curly	50.000	100% spinneret-dyed acrylic, Tempotest fibre	7 – 8 at 1 – 8 (DIN ISO EN 105-B04)	3 – 4 at 1 – 5		weatherproof, according to the manufacturer suitable for almost all weather conditions and temperatures, OEKO-TEX® Standard 100, 6-year manufacturer's guarantee onto the cover fabric – see details on following pages, PURATEX®-cleaning set for outdoor cover materials
T80	SK 30	flat weave	16.000	100% polypropylene	7 at 1 – 8	4 – 5 at 1 – 5	EN 1021-1, BS 5852 source 0	Active Line flat weave, OEKO-TEX® Standard 100, PURATEX®-cleaning set for outdoor cover materials

For Lovers

TEMPOTEST: FLAT WEAVE O80 & J81

Features:

High-quality textile feel and look which is very similar to natural fibre products. The fibre is water repellent, resistant to stains, salt and fading due to sunlight, with Teflon® finish, 6 years manufacturer's guarantee onto the cover fabric on colour loss caused by normal sunlight and normal weather conditions in general, Oeko-Tex Standard 100. Without chemical additives, high resistance to ageing.

Rubbing tours:

O80: 30.000; J81: 50.000 according to RAL GZ 430 for processing on upholstered furniture

Composition:

100% spinneret-dyed acrylic, Tempotest fibre

Rub resistance: very good

Colour/light fastness:

very good (DIN EN ISO 105-B04)

Pilling behaviour: very good (J81 good)

Weather resistance: Suitable for nearly all weather conditions and temperatures according to the manufacturer.

Characteristics of the fabrics:

Every flat fabric will roughen in use. Pilling is unavoidable and can also be caused by clothing and other textile fibres sticking to the fabric. Patina and shiny spots are to be expected in use. Loop pulls are to be expected when hooking with sharp objects or velcro.

Attention: Light colours show dirt and jeans wear on the fabric faster and more clearly than dark colours. Structure and colour deviations reserved! Staining caused by textiles is excluded from any manufacturer's warranty claims. This is by no means a defect in the upholstery fabric, but a defect in the garment textile, which must be claimed at the clothing store. The polluter pays principle applies here.

J81/21 light grey

Special features:

These two articles are absolute high-performance fabrics, made from the Tempotest brand fibre, with the highest properties and values. The light fastness of these articles is specified with the ISO EN 105-B04 standard, because this places even higher demands on an article. The fabrics have to withstand more than twice the number of hours of sunlight than ISO EN 105-B02. This is a special feature that we have deliberately used in this way. The Tempotest fibre, used especially for upholstery purposes and here, is a new generation of stronger yarns. This fibre gives the fabrics a distinct natural fibre/linen character.

Structure and colour deviations reserved! Staining caused by textiles is excluded from any manufacturer's warranty claims. This is by no means a defect in the upholstery fabric, but a defect in the garment textile, which must be claimed at the clothing store. The polluter pays principle applies here.

In order to maintain the manufacturer's guarantee on all usage and care properties on the cover fabric, it is important to note that no impregnation, sealing or stain protection is applied afterwards.

Special features:

A wide range of colours leaves nothing to be desired. The natural look and pleasant feel create a homely character in the outdoor area. These articles are not water-repellent, but breathable and form a functional unit together with the waterproof membrane underneath. Due to their composition and test values, these articles can be used both indoors and outdoors. Big plus: You can completely coordinate your indoor and outdoor furniture!

- Combined heat and power plant in planning

COMPANY PHILOSOPHY

Sustainability should not be „trendy“, but is a firm anchor in our corporate philosophy.

www.schillig-outdoor.com

www.schillig-outdoor.com

W.SCHILLIG outdoor furniture is made with true craftsmanship down to the last detail. From the frame to the cover, we guarantee high-quality materials that are carefully and precisely processed. The majority of W.SCHILLIG furniture is still made by hand. You can feel the decades of experience of our employees in the quality of our products. The quality management of W.SCHILLIG is checked annually by the TÜV Rheinland AG. All W.SCHILLIG products also bear the RAL-GZ 430/4 quality mark for healthy living.

Quality is our top priority. It starts with the frame of the furniture, all load-bearing parts of which are made of sturdy metal and have a solid base. The seat ideally consists of a high-quality RAL-compliant foam depending on the seating comfort.

The cushions are partly made of ergo-PUR upholstery foam (RG 35/46) according to DGM guidelines with high comfort. In order to meet the internationally varying seating preferences, W.SCHILLIG specifically addresses the needs of customers and trade partners. Despite the most modern, high-tech production methods, experience in craftsmanship is decisive for the typical W.SCHILLIG comfort. Every step in the process goes through quality control, with each upholsterer responsible for a complete set. We can say: your outdoor furniture is in good hands with us!

Quality with a golden "M"

W.SCHILLIG models are produced in accordance with the DIN and RAL quality guidelines of the Deutsche Gütegemeinschaft Möbel e.V. (German Furniture Quality Association) and all functions and materials are checked by authorised testing institutes, for example the Landesgewerbeanstalt Bayern (LGA). Only when the furniture has passed all the tests for durability, material quality, longevity, safety and health compatibility and the manufacturer can prove that he keeps his production at the same quality level, does the DGM award the RAL quality mark for furniture. This "Golden M", attached as a tag to the piece of furniture, means for the buyer: this is tested quality that he can rely on.

Our outdoor collection was developed in Germany, with production taking place at our site in Upper Franconia.

quality
Made in Germany

Safety and Care Instructions

Outdoor furniture is often purchased for reasons of appearance. As well as design, seating comfort and modern comfort functions are important decision factors. Regardless of material, construction and manufacturing, there are important product characteristics to take into consideration because later changes due to normal, natural usage do not represent a material defect. Outdoor furniture in particular was designed for use in specific conditions outdoors.

Marking

Caution is required with textiles that are not colour-fast, particularly dyed cotton materials such as jeans and T-shirts in intensive colour shades (red, black, dark blue etc.), which can cause marking because of body heat, moisture etc. This frequently happens with light covers on upholstered parts. This is usually caused by the textiles, not the upholstered furniture. The same applies to full-grain or velours leather. Please read the product information from the textile and leather manufacturers.

Measurement, installation and alignment

The measuring and planning of furniture is one of the most important tasks during furnishing and installation. The buyer is responsible for ensuring that the furniture actually fits on the intended floor space! Furniture should not be placed flush against the wall or too close to radiators or light sources. Sufficient air circulation must be provided. It is essential for furniture items to be aligned straight! Failure to do this will quickly result in consequential damage (e.g. tilting, trapping, squeaking, tearing, scratching and distortion) and even material breaches!

Weight-bearing capacity

The load-bearing capability of upholstered furniture, functional items and complementary items in general, be it made from glass, wood, metal or plastic, is extremely variable and limited. For this reason, attention must be paid to the maximum load-bearing capability limits in the specifications. Proper and sufficient support and stability is required. The individual values and notes can be found in the respective model enclosures. The requirements of the RAL-GZ 430/4 of the "Deutsche Gütegemeinschaft Möbel e.V." (German Furniture Quality Assurance Association) act as a guideline.

Use for correct purpose

Furniture that has been manufactured for the private living area may also only be used for general living requirements. It is not suitable for commercial or permanently on external areas. This applies to commercially used holiday apartments, offices, hotels etc. In the case of orders for the commercial area or the project area and public institutions, the applicable standards, safety regulations and basic rules must be followed.

Chemical reactions

Chemical reactions or discolouration may occur with many furniture surfaces that have long periods of contact with different materials, particularly plastics.

Chemical cleaning agents

Care must be taken with chemical cleaning agents such as acetone, acetic acid, cellulose thinner, sal ammoniac etc. These substances do not just damage the sensitive surface, but can also be a health hazard. Please always read the product description and the manufacturer's specification carefully.

Steam cleaners

Steam cleaners are not suitable for furniture, even if certain advertising promises otherwise. The steam pressure can destroy surfaces relatively quickly.

Colour deviations/colour patterns

Minor deviations between the showroom product and the delivered product in accordance with sample palettes or when re-ordering are unavoidable because of industrial manufacturing tolerances. The colour, texture, structure and pattern can only be approximately achieved, i.e. not 100%. Deliveries in accordance with colour samples are therefore usually excluded from complaints and replacement. We attempt to achieve the best possible match. It is always advisable to order in accordance with special coloured patterns in order to avoid colour and structure differences.

Colour migration/textiles which are non-colour-fast

With light material or leather coverings, colour migration may occur (marking or colour migration) in combination with dark or intensive colour shades, particularly with dark red, blue, black etc. The clothing industry is also aware of this phenomenon. This has been proven to be a defect in the clothing material. This has nothing to do with the quality of the furniture covering. Complaints of this nature can therefore not be accepted. Marking caused by items of clothing on light upholstered furniture is particularly known from jeans. This can be rectified by means of careful vacuuming or wiping with a damp cloth. Slight colour changes are typical with the product.

Fillings

The delineation of the chambers, quilting and/or filling material is a material and model-related characteristic in quilted mats, chamber cushions and cushions with loose filler material.

Leg and floor protection

Pay attention to the leg connections of the furniture when making your purchase. Industrial mass production determines the model-specific standard thereof. In

order to protect the different floors from scratches or damage, separate protective underlays such as felt, plastic, rubber or other glides must be placed beneath the leg variants if necessary which you can purchase in the trade.

Utility property

Usage-related changes that do not allow any conclusions to be drawn about workmanship and quality (e. g. B. often used space for upholstered furniture).

Odour

It is well known that new things have an odour. This can last for several weeks or months, depending on the material and the composition. Frequent ventilation or wiping with a damp cloth can help with this.

Pets

Extreme caution must be taken in this case. With pets it is the same as with all beings or objects that you are fond of – tolerance and understanding is required. Pets cannot be monitored 24 hours per day. It is up to the pet owners, house or apartment owners to supervise pets. A great deal of information is available from specialist magazines and media such as Stiftung Warentest (German consumer safety group), "Ein Herz für Tiere" ("A Heart for Animals" magazine) etc. One thing is for sure: Claws and animals with beaks can cause considerable and often irreparable damage. Animal hair, particularly cat hair, is difficult to remove from textiles. Cats, dogs etc. are free-roaming and bring everything possible with them into the house. There should not be any contact between animals and the coverings of furniture in order to protect small children and babies. Effective protection would be to protect the furniture that is at risk with suitable materials (covers, throws, etc., which can be washed or dry cleaned) from damage by animals.

Cushions/Chair covers/Removable covers

Particular attention must be paid to several things when using removable furniture covers. It is essential to pay attention to the composition of the material and the cleaning information. Can they be cleaned with chemicals? Are they washable, and how? Usually only up to 30 °C. They can easily shrink a little, and if they are not handled properly they may then be impossible or difficult to fit.

Light fastness in accordance with RAL-GZ 430/4

Light fastness is the resistance of a covering material to the effect of light (particularly sunlight, daylight, halogen lighting etc.). Light sources such as this (particularly sunlight) change surfaces, particularly wood surfaces, natural materials (e.g. cotton) and leather. This type of "sunburn" leads to colour changes due to chemical build-up. The discolouration of the material under the influence of light cannot be prevented in furniture coverings. Natural wood can go darker or yellow, and stained wood can

Safety and Care Instructions

fade. Valuable furniture must be protected from extreme light effects, since “absolute” light fastness cannot be achieved. The elemental power of the sun changes any material! Particular care therefore must be taken in bright south-facing rooms with a large proportion of light and glass. Particularly in sunlight, curtains or blinds should be closed, since otherwise the colour or brightness of the covering materials and surfaces may change in the affected locations after just a few weeks. “Colour changes” such as this have no influence on the usage or service life of the furniture.

Metal parts and finishes

Structural and colour deviations cannot be avoided. Painted metals, anodised or polished aluminium: A weak solution of washing-up liquid can be used for cleaning these metals. Alcohol and cleaning agent must not be used under any circumstances. Always wipe dry. For painted metals, anodised, polished or brushed aluminium, chromium, gold-plated surfaces, stainless steel, high-gloss polishing etc. the cleaning and care instructions must be adhered to.

Micro fibre cloths

Not everything that is available for chrome, stainless steel, metal, mirrors and glass is good for furniture as well. Therefore: Just to be safe, do not use microfibre cloths for furniture surfaces, upholstered furniture coverings such as leather, artificial leather or fabrics of any kind. Soft, clean cloths such as dishcloths or chamois leathers are more suitable, particularly in combination with the right cleaning agents.

Furniture polishing

Unless they are special polishes you are more likely to damage your furniture. Silicone marks are difficult to remove afterwards.

Installation instructions/Enclosures

Must be followed.

Body weight

According to RAL 430/4 the strength test is carried out with a fall weight of 75 kg, which corresponds to a body weight of 120 kg. In the event of a body weight of more than 120 kg, the manufacturer must be contacted with regard to the strength and durability of an upholstered furniture item before concluding the purchase agreement. Exceptions can be found in the respective product enclosure.

Care instructions

Guiding principle: Please always pay careful attention to the detailed product information, usage, cleaning and care instructions and also the manufacturer's instructions on the product! We would like you to enjoy our furniture for a long time. No warranty is given for damage caused by incorrect handling or the use of the wrong

care materials. This also applies to subsequent stain proofing of fabrics using external products, and extends to the private living area.

Do not put hot, heavy, sharp-edged or damp objects onto high-quality furniture surfaces, since this will cause pressure points or marks. Spilled acidic liquids such as fruit juice and alcohol must be dabbed off immediately and are not allowed to penetrate. Never rub the affected area using a great deal of pressure. Tobacco smoke, kitchen fumes and the effects of the environment leave their traces. In order to keep furniture in good condition for as long as possible, it must be cleaned at regular intervals.

Pilling formation

To begin with, small knots appear on some covering materials (mainly flat and mixed fabric) like the ones on woollen pullovers. These are usually caused by contact with external textiles which the user is wearing when sitting on the upholstered furniture. External pilling is a characteristic that is typical of the product, not a material defect. Special fluff removers are available with which the pills can be removed without problems in accordance with the manufacturer's instructions without damaging the covering fabric. Or they are loose particles of the yarn that has been used, usually mixed with clothing fluff. Pills frequently occur after a short period of use. Pilling formation and the removal of pills do not affect the durability of the furniture fabric.

Planning materials and delivery

A prerequisite for defect-free delivery and installation is exact determination of requirements, including room sizes, dimensions, wall composition and free access to the installation location (including door, stairway and corridor widths, lift, floor etc., these details come from the purchaser). The following must be clarified: Have the sockets and light switches been correctly routed? It must also be taken into consideration that the floor, walls and ceilings are not quite straight and must therefore be adapted and compensated for during installation. If changes are made to the rooms at short notice, the vendor and the installer must be notified thereof in good time. The relevant room/area must be accessible. The furniture must be arranged in such a way that it is horizontally aligned.

Upholstered furniture in general

Upholstered furniture is soft and malleable. It should not be purchased on the basis of attractiveness alone, but also in accordance with the respective requirements. That which is often underestimated is the fact that upholstered furniture is used for about 3–5 hours per day, usually in a favourite location. Visual changes are then unavoidable, and normal wear will occur. This has very little effect on usage, benefit or service life. Upholstered furniture must be horizontally aligned and be straight. If the floor is uneven or made uneven because of carpets, this must be compensated for or something placed beneath the furniture (please pay attention to product in-

formation).

“Firm” upholstery

With this type of upholstery, the covering is pulled tight over the padding and joined. This avoids excessive crease formation during use. In the majority of cases, the creases that are formed during sitting even themselves out again. However, permanent crease formation may occur as the amount of use increases, minor though it may be. This is not a quality defect but a characteristic that is typical of the product, and is not attributable to deterioration of the upholstery but the expansion of the covering material. A typical recognition feature is its straight-lined appearance. The seating comfort differs from other types of upholstery in that you do not sink very deep into the padding but sit firmly on top of the padding. Lines, e.g. at curves or gatherings are design, model or structure-related.

“Loose” upholstery

The “loose upholstery” that we prefer is recognisable by its suppleness. With this type of upholstery, the covering is not continuously attached to the padding. The padding is softer and the cover is looser, meaning that you sit “in the sofa” and not “on the sofa”. A visually rippled surface of the coverings and wear lustre are not a quality defect, but are model-related or desirable from a design point of view, for providing optimum sitting comfort. It can be assumed that the upholstery is soft if gathers or rippling are present in some locations. It can be assumed that the coverings will stretch during use and the formation of ripples may increase. However, this change does not affect usability.

“Very loose” upholstery

“Very loose upholstery” is characterised by the extremely soft surface. The coverings can have a distinct ripple pattern when the furniture is new, which is desirable from a design, model and construction related point of view. It can be assumed that the coverings will stretch during use and the formation of ripples may increase. However, this change does not affect usability (see also “Ripple and hollow formation”).

Friction resistance

With regard to the colours of furniture fabrics, they are friction resistant if they fulfil the requirements of RAL-GZ 430/4 of the “Deutsche Gütegemeinschaft Möbel e.V.” These requirements determine the extent to which a covering may mark or rub off. Light colours usually have better friction resistance than darker colours.

Cleaning

Only distilled water and neutral soap should be used for cleaning, and you should rub carefully with a white, soft clean cloth, always over a large area from seam to seam, gently and without pressure and never on the same spot (colour rub-off and

Safety and Care Instructions

marks)! Please do not use microfibre cloths or steam cleaners. A test in a non-visible location would be advisable. Caution: Always pay attention to the detailed manufacturer's information on the product! The warranty/guarantee does not cover damage caused by external products such as steam cleaners, impregnation and cleaning material that is not recommended by the manufacturer, marking caused by jeans and other textiles which are not colour-fast, Velcro tape on leisure clothing and other stuck-on substances containing sugar, acid, plasticiser, bleach or solvent, alcohol residue, adhesive tape of any kind (e.g. Sellotape).

Differences in seat firmness

Seat comfort can differ within an upholstered suite. Construction and shape often mean that it is not possible to give each element used the same suspension (e.g. in the case of corner and linking elements, ottomen, different basic geometric shapes and end elements etc). It is also possible for seat firmnesses to appear different, although the upholstery is the same. (Foam may have technical tolerances of +/-15% within its unit weight). For this reason it is essential to carry out an intensive "sitting test" prior to making the purchase. For manufacturing reasons, the tolerances in the foam material may be larger if it is new. The seat cushion and the backrest cushion are generally only uniform in sections of the upholstery with the same shape and size.

Location

Upholstered furniture items, tables, functional furniture etc. must be horizontally aligned and straight when it is set up or installed. Small height differences due to uneven floors or unevenness during installation can lead to consequential damage to the subframe after weeks or months, e.g. cracking or squeaking noises. In order to protect your floor from scratches, the respective floor covering must be protected with an additional underlay (e.g. felt glides).

Fabrics

For detailed fabrics information, please view these pages as well as our website. The range of available textile covering material is increasing all the time. You should not make your decision on the basis of appearance alone, but also in terms of usage, cleaning and care etc. Your individual requirements and the size of your household are also decisive. Attention must be paid to the different qualities and product information from the manufacturers. Do you have any pets? Please remember: there is no such thing as cat or claw-proof covering material! Advice therefore is extremely important when buying upholstered furniture.

Tolerances

Tolerances cannot be avoided in furniture during industrial mass production and for technical manufacturing reasons. The majority of tolerances are laid down in the quality and test conditions RALGZ 430/4 of the "Deutsche Gütegemeinschaft Möbel e.V." with the "Golden M" quality symbol. If the deviations (tolerances) are in the insignificant range with regard to colour, dimensions and structure as far as the national and international standard is concerned, no defect is present. These are "product-specific characteristics". These are acceptable production and manufacturing deviations – almost always minor visual deviations which have no effect on usage, benefit, functionality, safety and service life.

Maintenance

In this case, the manufacturer's instructions on the product must always be followed! Daily use leaves traces behind. It is important for spilled liquids or contamination (e.g. fruit juice, alcohol etc.) to be dabbed off immediately with an absorbent kitchen towel or clean cloth/dishcloth – not rubbed, so that the liquid cannot penetrate the surface. Do not use microfibre cloths. Do not rub on the spot, and do not use furniture cleaner containing silicone. Never remove damaged areas using solvents (e.g. stain remover, turpentine, petrol, and certainly not a steam cleaner).

Ripple and hollow formation (crease formation)

Definition of term in accordance with RAL-GZ 430/4: "A ripple is a deformation that deviates from the original upholstery surface. A crease is a ripple with a kink". The measuring method and the tolerances can be found in RAL-GZ 430/4. With so-called "sitting in" or "lying in" the seat firmness and the appearance usually change after even a short period of use. The seat firmness reduces depending on the type and duration of use. The body weight of the person(s) using the furniture also plays a part. This is a normal process which all upholstery goes through. In order to achieve even seat firmness for as long as possible, it is important to switch your favourite places on upholstered furniture. Otherwise one-sided ripple or hollow formation may occur. This development is supported by the fact that the covering materials stretch more or less under the influence of body weight and heat and cause "ripples" to form. These visual changes have little influence on usage, functionality and service life, and are not a defect. Regular plumping of the coverings and cushions are a part of normal duty of care. The "ripples or creases" can be measured by specialists or experts exactly and in accordance with regulations. Exception: This procedure for determining the ripple may not be carried out on "very loose" models, since for design reasons the cut of the covering has been kept somewhat bigger or the upholstery structure contains softer materials (e.g. down coverings, extremely delicate padding, mat coverings, belt spring base etc.). The guideline values cannot be used in this case. The ripple formation may be more pronounced here, without being a

cause for complaint. Source: RAL-GZ 430/4. "Stiftung Warentest" recommends using the seats as evenly as possible so that the appearance can adapt itself to your sitting habits. If you do not like or even reject this soft appearance, you should choose sitting and lying furniture with "firm" padding.

Tools

Only use the fittings, tools and materials prescribed by the manufacturer. Failure to do this usually invalidates the warranty. In case of doubt, consult an expert.

Tips FOR OUTDOOR FURNITURE

Outdoor furniture is exposed to the toughest conditions. To keep your furniture looking good for a long time, please observe the following points in particular, in addition to the safety and care instructions listed on the previous pages:

Furniture location

Here, the choice of location clearly influences the subsequent maintenance effort. By avoiding close proximity to trees and shrubs, you are doing yourself and the furniture a favour. Good ventilation ensures that the furniture dries quickly: leave some air between the piece of furniture and the walls, tilt it and place the cushions at an angle when not in use so that the furniture can also be well ventilated from below. Extreme UV radiation promotes the embrittlement of the materials and should be avoided in the long term. Contact with chlorinated water at the pool also has a negative effect on the life of the furniture.

Longer periods of bad weather and winter storage

Covering the furniture is no substitute for storing it during periods of bad weather, especially in the European autumn and winter months. Frost, rain and dirty water can cause the formation of unsightly stains that are difficult or impossible to remove! To prevent rainwater from collecting on the seat surfaces, tilt the upholstery slightly. If rainwater does collect, use a cloth to remove it and avoid strong friction. If the cushions get wet, let them air dry. A dry and well-ventilated place is best for storage. Outdoor storage is not recommended in bad weather. Hail, very strong UV radiation, snow and ice can damage the furniture. Water and liquids should always be removed from the platforms to prevent foxing. The individual elements are not suitable for stacking on top of each other. When moving the furniture, please lift it to avoid scratches from the metal feet.

Weather protection

For bad weather periods in the warm months, we recommend covering the furniture. Our high-quality weather protection covers made of Sunbrella® Surlast (V99/21) in various sizes, according to the items ordered, reduce the maintenance effort and increase the life of the furniture. The covers consist of a breathable membrane that is washable, UV-stable, lightweight and foldable. They are custom-made to fit the furniture. An additional rubber loop on the underside provides additional protection in windy conditions. It is important to note that the furniture must not be covered when damp or dirty. Allow the elements to air dry well before covering them. Remove the cover from time to time to ensure good ventilation. The weather protection covers can be cleaned if they become dirty. For this purpose, please use the gentle wash cycle of your washing machine, do not spin them and do not put them in the dryer.

Avoiding mould and mildew stains

Mould and microbial infestation depend on humidity, temperature, ventilation conditions and the specific growing medium present. Mould growth can occur if the upholstery is permanently damp without sufficient opportunity to dry completely. Soiling, contaminated dripping water, pollen, possibly also residues of skin and hand cream/sun cream can then lead to mould growth in a short time, usually within a few days lead to mould growth. This cannot be avoided even with additional microbial treatment of the upholstery fabric and upholstery; mould growth is merely delayed. It is therefore essential to ensure that the upholstery dries sufficiently. If the upholstery is hardly used, as is the case in late autumn and winter, mould germs can act more quickly because they need "rest" to continue to form. Germ formation is not caused by the quality of the fabric or upholstery material, but by the circumstances of a constant supply of moisture (rain/snow) and the fact that the upholstery does not always dry out completely. Therefore, be sure to observe our points on winter storage and weather protection.

sunbrella®

A special material for special demands

We have chosen a very special material for the production of our weather protection covers. V99/21 is none other than the material Sunbrella® Surlast, the worldwide reference for nautical furnishing fabrics for boat equipment and interior and exterior furnishing from the USA. These fabrics are woven exclusively from Sunbrella® acrylic fibres. This marine fabric perfectly meets all the requirements for protective coverings on board boats and can therefore withstand the most extreme conditions at sea. The fabric is UV and lightfast and the colours retain their brilliance for years. They are waterproof, rot-proof and hard-wearing, making them ideal for making covers for outdoor furniture. Thanks to its lightness, the fabric is easy to handle and store.

Application: for covers, tarpaulin

Material: 100% PU-coated polyester on one side, 240 g/m²

Special features:

Lightweight, supple, convenient to fold and stow, water-, tear- and abrasion-resistant, easy-care

Source: www.dickson-constant.com

Clean regularly

Clean your outdoor furniture regularly and at least every 2 to 4 weeks to remove particle build-up such as dust, biofilm or pollen, ideally using a Hoover with a soft brush and without water.

Remove heavy soiling immediately

Soiling and build-up caused by leaves, dirt, grass and bird droppings should be removed from the furniture immediately. When doing so, avoid introducing pollen and bio-deposits into the upholstery. To avoid spreading stains, always work bitterly from the outside in. Soak up liquids with the help of an absorbent cloth (we recommend a cotton kitchen towel or a paper towel) by dabbing and rub with a dry cloth. Solid or soft residues such as ketchup, chocolate cream etc. must first be carefully removed with a blunt object (e.g. a spoon). Then carefully remove the remains by dabbing with a slightly damp kitchen towel. Dried-in stains must first be carefully brushed out and then removed by dabbing with a slightly damp kitchen towel. If necessary, you can help with a small amount of neutral soap. You can buy this in drugstores.

Do not treat the upholstered furniture with aggressive or household cleaners. We accept no liability for improper cleaning.

Stain removal

For the treatment of new stains, we recommend **Puratex cleaner for outdoor covers** for our Active Line flat fabrics T80, T84, V80, V81, V82, V83 and V84 as well as for the jacquard fabrics J81 and O80, which can be obtained from LCK.:

www.schillig-outdoor-moebelpflege.de.

For the exact steps, please refer to the instructions on this website as well as the instructions enclosed with the respective cleaner. LCK also recommends the Staubfix care glove.

In the case of Rohleder upholstery fabrics W82, D65 and O10, in order to maintain the manufacturer's guarantee on all usage and care properties on the upholstery fabric, it is important to note that no impregnation, sealing or stain protection should be applied afterwards.

DIE GANZE WELT DER MÖBELPFLEGE

General Terms AND CONDITIONS

1. General

These general terms and conditions of business alone shall govern the entire business relationship with our customers. They shall also apply for all future business relationships without having to be expressly included again. Any terms and conditions of purchase or other terms and conditions of business of our customers which may contradict our terms and conditions of business shall not become part of the contract should we not object to them or should we deliver the consignment.

2. Terms of payment and offsetting

The remuneration shall be payable in full upon delivery, unless other terms of payment have been agreed. The Customer shall be in default thirty days from the date on which payment is due, unless he has paid, otherwise he owes the legal default interest. The Customer shall not be entitled to assert claims and rights on account of defects if he has not paid-up payments which are payable, and the payable amount is in a reasonable proportion to the value of the consignment beset with defects. Above and beyond this, offsetting against claims by W.SCHILLIG outdoor or asserting a right of retention against a claim by W.SCHILLIG outdoor is not allowed, unless this counter claim has been recognised by W.SCHILLIG outdoor or has been declared final and absolute in a court of law.

3. Delivery date

Deadlines and appointments held out for by W.SCHILLIG outdoor for performances or deliveries are always approximate. Anything to the contrary only applies when the customer and W.SCHILLIG outdoor have agreed to a set period, or set appointment expressly. As far as delivery has been agreed upon, the delivery appointment or deadline refers to the point in time when the object is transferred to the carrying company, the freight company, or any other third party commissioned with the delivery. W.SCHILLIG outdoor is entitled to demand an extension to the delivery and performance appointment for the period in which the customer does not fulfil his duties vis-à-vis W.SCHILLIG outdoor – notwithstanding the rights from the delay.

4. Dispatch and passing of risk

The type of delivery and packaging is subject to W.SCHILLIG outdoor's dutiful discretion. Risk is transferred to the customer at the latest upon delivery of the subject of delivery, whereby the commencement of the loading process to the freight company, the carrying company or the third party commissioned with the delivery is significant. W.SCHILLIG outdoor assumes no liability for damages or losses in transit, as long as W.SCHILLIG outdoor cannot be accused of dealing with gross negligence or intention. Should the delivery or transfer of risk be delayed for reasons which are the customer's responsibility, risk is transferred as of the day in which the subject of delivery is ready for dispatch and W.SCHILLIG outdoor has informed the customer of this. Should nothing to the contrary have been agreed upon, delivery will take place FCA and duty unpaid for inter-

national transport. The customer will carry the costs of storage after risk is transferred. If W.SCHILLIG outdoor is to store the subject of delivery, the cost is 0.25% of the invoiced amount of the object to be delivered per finished week. The right to provide proof of fewer costs or further costs remains unaffected.

Unless delivery has not been agreed upon with customer, W.SCHILLIG outdoor reserves the right at shipment of merchandise basically not to ensure it in case of shipment. Upon the express wish of the customer, W.SCHILLIG outdoor may inspect the possibility of ensuring the delivery against insurable risks, at the expense of the customer, whereby W.SCHILLIG outdoor reserves the right to deny insuring the delivery.

5. Reservation of title

W.SCHILLIG outdoor shall be granted the following securities until all the claims to which W.SCHILLIG outdoor is entitled (including all claims on the balance of current account) based on any legal reason against the Customer now or in future until all W.SCHILLIG outdoor claims are fulfilled. Upon demand such securities shall be released by W.SCHILLIG outdoor at its choice, provided that the value of such securities exceeds its claims by more than 20% on a permanent basis. The goods shall remain the property of W.SCHILLIG outdoor until all its secured claims have been paid for in full. Processing or transformation of the goods shall always be affected for W.SCHILLIG outdoor as manufacturer, without however, this creating any obligation for W.SCHILLIG outdoor. If the (co) ownership of W.SCHILLIG outdoor expires as a result of its products being combined with other products, it shall consequently be agreed here and now that the (co) ownership of W.SCHILLIG outdoor to the combined thing shall pass over to W.SCHILLIG outdoor in proportion to the value of W.SCHILLIG outdoor goods to the invoiced value of the combined thing. The Customer shall keep the (co) ownership of W.SCHILLIG outdoor without payment. Goods to which W.SCHILLIG outdoor is entitled to (co) ownership, shall be known in the following as goods subject to reservation of title.

The Customer shall be entitled to process and sell the goods subject to reservation of title in the course of a proper commercial transaction, as long as he is not in default with paying W.SCHILLIG outdoor's invoices. The Customer must not pledge the goods subject to reservation of title or assign them by bill of a sale as a security. The claims created with regard to the goods subject to reservation of title (including all claims on the balance of current account) from resale or other legal reason (insurance, claim against third parties for damages in compensation on account of an illegal act) shall be assigned by the customer to W.SCHILLIG outdoor here and now and in full for the sake of security.

W.SCHILLIG outdoor authorises the customer revocably to collect the assigned claims for W.SCHILLIG outdoor's account but in his own name. This collection authorization can be revoked, if the Customer does not fulfil his payment obligations to W.SCHILLIG outdoor properly.

In the event of third party seizures of the goods subject to reservation of title, the

Customer shall point out that the goods are the property of W.SCHILLIG outdoor and notify W.SCHILLIG outdoor of the seizure immediately. Costs and damages shall be reimbursed by the Customer. In the event of breaches of duty by the Customer, in particular default in payment, W.SCHILLIG outdoor shall be entitled, even without setting a time limit to demand the surrender of the delivered goods and / or to withdraw from the contract; the Customer shall be obliged to hand over the goods. A demand for the surrender of the delivered goods shall not constitute withdrawal from the contract by the seller unless this is expressly stated.

6. Limitation of liability and conditions for claims based on defects

Warranty claims are not valid for an insignificant deviation from the quality, which has been agreed on, or for an insignificant impairment of usefulness. Usual differences in the surface structure of leather covers are no defects.

In addition, warranty claims shall only be valid if notification of recognizable defects is made in writing before transfer of possession or delivery to the end customer. Every complaint about a defect must be in writing. Each complaint must be made promptly. This means that the notification of a defect must be received in writing by W.SCHILLIG outdoor no later than 10 (ten) calendar days after the delivery and for overseas deliveries 30 (thirty) calendar days. The fulfilment of this obligation to notify in writing is also a prerequisite for claims according to paragraph 478 of the German Civil Code.

In all cases W.SCHILLIG outdoor shall be entitled to choose between rectifying the defect and supplying new goods. If the subsequent fulfilment is unsuccessful, the Customer shall consequently be entitled to reduce the price or to withdraw from the contract. If the Customer demands compensation for damages instead of performance, or carries out a repair himself, W.SCHILLIG outdoor shall be allowed a second attempt to effect subsequent fulfilment. Only once this second attempt has failed shall subsequent fulfilment be regarded as having been unsuccessful.

This expenditure required for the purposes of subsequent fulfilment shall be borne by the Customer, in so far as they increase as a result of the goods and services having to be rendered to a place other than the Customer's premises.

In cases of intent or gross negligence W.SCHILLIG outdoor shall be liable in accordance with the law. Moreover W.SCHILLIG outdoor shall only be liable in accordance with the (German) Product Liability Law, on account of loss of life, physical injury or impairment of health or on account of a culpable breach of important contractual obligations. The right to compensation for the breach of important contractual duties and in all cases of gross negligence is however, limited to damages which are foreseeable for this type of contract.

W.SCHILLIG outdoor's liability shall also be limited in all cases of gross negligence to damages which are foreseeable for this type of contract. Liability for damage to the Customer's legal property is ruled out. This shall only not apply in cases of intent or gross negligence or on account of loss of life, physical injury or impairment to

health. The exclusion of liability shall also cover compensation for damages plus performance and compensation for damages instead of performance, regardless of the legal reason, in particular on account of defects, the breach of duties under the obligation or illegal act.

Moreover, W.SCHILLIG outdoor's liability on account of delay in performance for compensation for damages in addition to performance shall be limited to 5% and for compensation for damages instead of performance to 10% of the value of the goods or service. Claims by the customer over and above this shall be ruled out. Liability by W.SCHILLIG outdoor on account of impossibility for compensation for damages and to the reimbursement of expenditure spent unsuccessfully shall be limited to a total of 10% of the value of the goods and services. Claims over and above this by the customer on account of impossibility of supply are ruled out. These limitations shall not apply in cases of intent, gross negligence or on account of loss of life, physical injury or impairment to health. The Customer's right to withdraw from the contract on account of impossibility shall not be affected as a result of this.

The limitation period for defect claims concerning deliveries and services amounts to one year from the time of delivery. This does, however, not apply to cases under Section 479(1) of the Bürgerliches Gesetzbuch ('German Civil Code'), unless the recourse claims of the customer against W.SCHILLIG outdoor are effectively excluded. Claims and rights arising due to defects in the deliveries of used articles – regardless of the legal grounds – are excluded. This exclusion provision for the deliveries of used articles also applies to all claims for damages against W.SCHILLIG outdoor which are connected to the defects, regardless of the legal ground for the claim. To the extent that claims for damages of any kind exist against W.SCHILLIG outdoor which are not connected to a defect, these shall be excluded. The provision on the limitation period and the exclusion provision are not generally applicable in the case of intent, if W.SCHILLIG outdoor has maliciously not disclosed a defect, for claims for damages in cases of injury to life, limb, health or freedom, for claims stemming from the Produkthaftungsgesetz ('Product Liability Law'), in the case of a gross negligent breach of duty or in the case of a violation of essential contractual duties.

The Customer shall not have any right of recourse against W.SCHILLIG outdoor in accordance with § 478 BGB, because W.SCHILLIG outdoor grants a discount on the purchase prices charged to date in line with the net purchase list in force at that time.

7. Place of fulfilment and place of jurisdiction

W.SCHILLIG outdoor's headquarter in 96237 Ebersdorf-Frohnach, Germany shall be regarded as the place of fulfilment for all deliveries. The sole place of jurisdiction for all legal disputes is Coburg. Binding legal regulations regarding sole jurisdiction remain unaffected by this regulation. These terms and conditions of business shall be governed by German law excluding United Nations Convention on Contracts for the International Sales of Goods.

8. Written form

Any addition or amendment to contracts, general terms and conditions or other agreements must be made in writing.

9. Validity

Should this contract or these general terms and conditions contain loopholes, then the legally effective regulation applicable to the implementation of the contract, which comes closest to the goals of the contract and these general terms and conditions, which the contractual partners would have agreed upon were they aware of the loophole, is seen as agreed upon.
